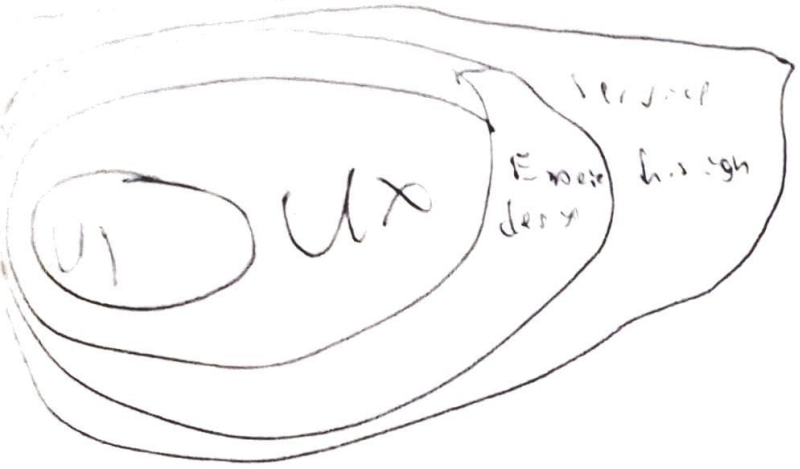
1x HCD | UCD | UI



UX → quality of experience (~~wid~~) focuses on a specific technology

UI → Tool to maximize a person's experience
- interaction | colors | overall aesthetics
- ~~Fo~~

Lean Ux → speeds up UX process | measuring; validating | market fit

Agile UX → collaboration designers | How do we making it?

Design Thinking

- ~~Empathize~~
- Immersion | Ideation | Implementation

Empathise | Define | Ideate | Prototype | Test

Who / What | Interviews / User testing / Survey

- Talk and listen how they think, act, feel

Problem Statement

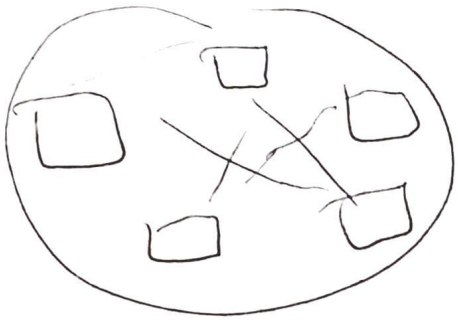
users needs > business goals

Ideate: Colaborate, Quality, Quantity

understand

TOOLS

~~Sket~~ Stakeholder Map



Paydoylar

Sticky Notes

- Assume
- Dont Delay

6 Stages of the UX design process

Stage 1: Understand
user | brand

S2: Research → Interviews, focus groups, Surveys, Usability Testing
3 - 5 users enough

S3: Analyse User Persona / User Journey maps

S4: Design

S5: Launch

S6: Analyze again

Problem:

- Understanding babies

- Parents stay up all night try to be baby nanny and sleep so they can sleep

Persona / Target Audience

- Rugaya and her husband new parents
  - live in urban
  - Designer
  - Flexible working hours
  - So have time / attention
  - ⚠ Need help from friends
    - To understand what baby needs
    - How to figure out / as a routine
